

# NEW FEATURE: Snapshot to PDF

December 2021

## Filtered and drilled down into your Power BI report using Binokula and found an interesting insight?

- Click on the NEW camera icon, located near the bottom of the Binokula menu bar.
- Record exactly the current filtered view as a single page as a PDF file.
- Print / save the file as required (that's it!)

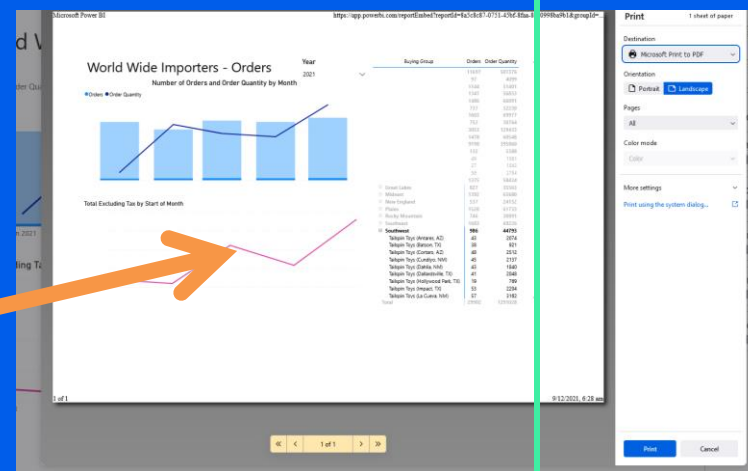

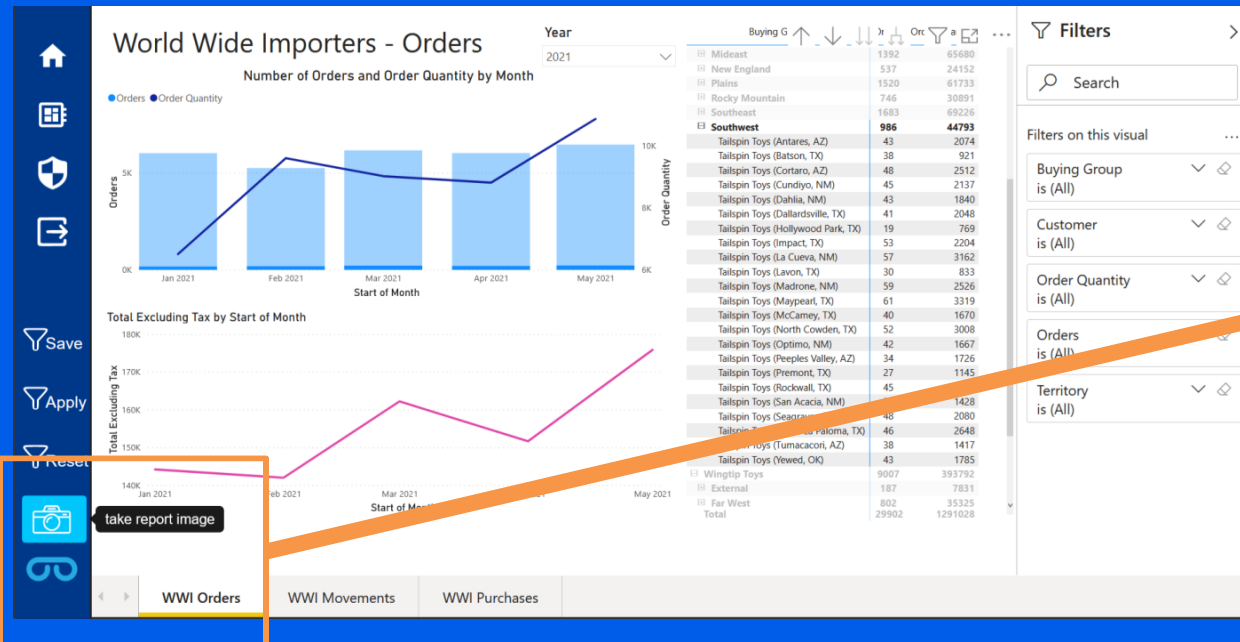

Feature is live and free in the application with all Binokula subscriptions.

# NEW FEATURE: Snapshot to PDF

December 2021

## Example from our Demonstration report set:

- The World Wide Importers (WWI) Executive is getting prepared for a forecasting meeting with their distributor Tail Spin, ahead of a visit to the Southwest area.
- WWI is able to review orders place by the distributor in Southwest, drilling down to show all distributors branch locations. Orders look to be steady month-on-month despite reported new heavy competition in the area.
- The executive uses the snapshot function to save a copy of the visual to use during their visit.
